MANAGEMENT DISCUSSION AND ANALYSIS REPORT

We submit herewith the “Management Discussion and Analysis Report” on the business of the Company as applicable to the extent relevant.

TEXTILE INDUSTRY IN INDIA- STRUCTURE AND DEVELOPMENT

India’s textile sector is one of the oldest industries in Indian economy dating back several centuries. Even today, textiles sector is one of the largest contributors to India’s exports. The textile industry is also labor intensive and is one of the largest employer. The textile industry has two broad segments. First, the unorganized sector consists of handloom, handicrafts and sericulture, which are operated on a small scale and through traditional tools and methods. The second is the organized sector consisting of spinning, apparel and garments segment which apply modern machinery and techniques such as economies of scale.

India accounts for good percentage of the world’s production of textile fibre & yarns. Fabric production in the country rose to millions. The industry is the second largest employer after agriculture, providing employment to over millions of people directly and indirectly. The Indian Textile Industry contributes a good percentage to India’s Gross Domestic Product (GDP), and overall Index of Industrial Production (IIP).

The Indian Textiles Industry has an overwhelming presence in the economic life of the country. Apart from providing one of the basic necessities of life, the textiles industry also plays a vital role through its contribution to industrial output, employment generation, and the export earnings of the Country.

OPPORTUNITIES

The most significant change in the Indian textile industry has been the advent of man-made fibres (MMF). India has successfully placed its innovative range of MMF textiles in almost all the countries across the globe. The future outlook for the Indian textile industry looks promising, buoyed by both strong domestic consumption as well as export demand. With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth in the past decade.

Opportunities available to the Company in the present scenario, which can be seized for the benefit of the Company and ultimately to the stakeholders, can be summarized as under:

1. The government had extended the duty drawback facility on all textile products & increased the rates in some cases to boost exports in the sector.
2. In the Union budget, a good amount has been allocated to the Ministry of Textiles in order to support various schemes covering the textile industry.
3. Capacity built over years has led to low cost of production per unit in India’s textile industry; this has lent a strong competitive advantage to the country’s textile exporters relative to key global peers.
4. India’s growing population has been a key driver of textile consumption growth in the country.
5. The Indian textile industry is set for strong growth, buoyed by both strong domestic consumption as well as export demand
6. Urbanization is expected to support higher growth due to change in fashion & trends.

THREATS

Based on review of the textile market situation and level of rivalry present in the domestic market, following threats might be present in the market, which can hinder growth of the revenue of the Company:

1. Intense competition between established brands and private label brands.
2. Low cost substitute products from other countries
3. Significant presence of small suppliers has reduced the bargaining power.

4. Major clothing brands have better bargaining power over textile manufacturers, as the product differentiation is low and number of players are high and fragmented.
